MEDICAL HISTORY

Patient: **IVAN GLASNOVIĆ**
Date of birth: 31/10/1997
Address:

ID no. of the insured person (MBO):
Insured person's no.:
Insurance category:

Date of entry: 12/09/2022
Physician: ROBERT BULJUBAŠIĆ

Date of examination: 12/09/2022

Diagnosis:

Q66.0 Talipes equinovarus

Lat. diagnosis:

Pes equinovarus congenitus

Additional lat. diagnosis:

Monohemiparesis dex.

Anamnesis:

The patient comes because of "hopping" on the right leg. One of the brothers born as triplets with right-sided hemiparesis. Examined and treated since birth.

Status:

Right-sided musculature slightly atrophic (forearm and upper legs), shortening of the right leg by 2 to 3 cm.

Slight foot drop. Arches of both feet collapsed.

Recommendation:

A 2 cm insole for the right heel and orthopedic insoles recommended.
Muscle strengthening exercises.
